

CALL FOR PAPERS

ICSGP 2021
Jan 25-26, 2021
Paris, France

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSGP 2021 : International Conference on Structural Geology Processes is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Structural Geology Processes. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Structural geology

Fundamentals of structural geology

Processes in structural geology and tectonics

Structural geology and map interpretation

Structural geology and structural analysis

Methods of structural geology

Field geology

Geophysics

Data synthesis and analysis

Extensional fractures and shear fractures

Joints, stylolithes and stylolitic joints

Faults and tectonic regimes

Fault kinematic analysis

Force, traction and stress

Paleostress analysis

Stress perturbation

Folds systems

Use and importance

Methods

Geometries

Measurement conventions

Plane, fabric, fold and deformation conventions

Stereographic projections

Rock macro-structures

Rock microstructures

Kinematics
