

CALL FOR PAPERS

ICBBMS 2021
Jan 18-19, 2021
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBBMS 2021 : International Conference on Biobased Building Materials and Sustainability is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Biobased Building Materials and Sustainability. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Natural fibres and materials
Wood and bamboo
Earthen ramped
Mechanical performances of
bio-based building materials
Hygroscopic and hygrothermal
properties of biomaterials
Acoustic of bio-materials
Eco-friendly binders with low
CO₂-emission and low embedded
energy

Durability and performance of
bio-construction materials
Life-cycle assessment of
materials
Construction with low binder
sprayed concrete on bio-based
building materials
Green and renewable energy
applications in construction
Construction materials and
technologies for sustainability,
energy efficiency
Advances in research methodologies
and bio-materials testing
