

CALL FOR PAPERS

ICBEMM 2021
Jan 18-19, 2021
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBEMM 2021 : International Conference on Biomedical Engineering and Beneficial Microbes is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Biomedical Engineering and Beneficial Microbes. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Microbes and the human body
Biomedical engineering and
microbiological researches
Microbes definition
Microbes and human health
Microbial genome resources and
clinical microbiology
Microbial ecology
Food and microbial engineering
Microbes and industry
Microbes in medicine

Genetic engineering of microbes
Energy and microbes
Pharmaceutical significance of
microbes
Metabolic engineering and synthetic
biology
Beneficial microbes in agriculture
Microbial biodegradation
Veterinary microbiology and
microbial disease
Dna and microbial genome resources
Microbes, food and safety
