

# CALL FOR PAPERS

**ICCSEDA 2021**  
**Jan 18-19, 2021**  
**Rome, Italy**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCSEDA 2021 : International Conference on Communications Software Engineering and Design Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Communications Software Engineering and Design Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Communications software  
engineering

Software design for communication  
systems

Communication software

Communication software, design,  
development and construction

Software engineering for developing  
new communication techniques

Information systems and engineering  
for communication systems

Communication and software  
engineering

Ubiquitous computing services and  
applications

Networked autonomous systems

Communications software in  
vehicular communications

Web services and distributed  
software technology

Software for distributed systems  
and applications

Smart grid and cloud computing  
services

Peer-to-peer technologies for  
communication services

Terminal emulators

File transfer programs

Chat and instant messaging  
programs

Special transfer modes and methods

Software systems for real-time  
communication

E-mail, video chat and messages and  
web conferencing

Relationship between analysis and  
design

Stages of design and state  
diagrams

Impact of implementation  
environment

Definition of sequence diagrams

Sequence diagrams for use cases

Creation of class interfaces
