

# CALL FOR PAPERS

**ICEBNS 2021**  
**Jan 18-19, 2021**  
**Rome, Italy**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEBNS 2021 : International Conference on Evolutionary Biology and Natural Selection is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Evolutionary Biology and Natural Selection. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Evolutionary biology  
Evolution  
Evolutionary processes  
Natural selection  
Differential survival and reproduction of individuals  
Random mutations  
Examples of natural selection  
Genome of an individual organism  
Sexual selection  
Fecundity selection  
General principles  
Nomenclature and usage  
Types of selection

Evolution by means of natural selection  
Speciation  
Historical development  
Pre-darwinian theories  
Darwin's theory  
Modern evolutionary synthesis  
Genetic basis of natural selection  
Genotype and phenotype  
Directionality of selection  
Selection and genetic variation  
Mutation-selection balance  
Genetic linkage  
Emergence of natural selection
