

# CALL FOR PAPERS

**ICEBPE 2021**  
**Jan 18-19, 2021**  
**Rome, Italy**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEBPE 2021 : International Conference on Evolutionary Biology and Protein Evolution is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Evolutionary Biology and Protein Evolution. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Evolutionary biology  
Evolution  
Molecular evolution  
Composition of cellular molecules  
such as DNA, RNA and proteins  
across generations  
Mutation  
Recombination  
Gene conversion  
Genome size  
Repetitive elements  
Chromosome number and organization  
Gene content and distribution  
Organelles  
Origins of new genes

Molecular phylogenetics  
The driving forces of evolution  
Protein evolution  
Evolutionary processes  
Diversity of life on Earth  
Origin of life  
Descent of species  
The origin of new species  
Genetics, ecology, systematics and  
paleontology  
Genetic architecture of adaptation  
Natural selection  
Sexual selection  
Genetic drift and biogeography
