

CALL FOR PAPERS

ICFEMACM 2021
Jan 18-19, 2021
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICFEMACM 2021 : International Conference on Finite Element Modelling and Analysis of Composite Materials is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Finite Element Modelling and Analysis of Composite Materials. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Finite element modelling of
composite materials and structures
Finite element analysis
Finite elements applied to
composite materials
Composites and finite element
analysis

Composite materials in finite
element analysis
Analytical and numerical modelling
Interlaminar stresses and free edge
stresses
Fracture and fracture mechanics
