

CALL FOR PAPERS

ICHRS 2021
Jan 18-19, 2021
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICHRS 2021 : International Conference on Habitat Restoration Science is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Habitat Restoration Science. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Habitat restoration and conservation
Habitat restoration programs, design, planning and implementation
Ecosystem-based approach to habitat restoration
Natural resource management
Stream habitat restoration and conservation
Ecological and social dimensions of ecosystem restoration
Site assessment tools and techniques for habitat restoration
Monitoring and evaluation of states of habitats
Habitat development and assessing the ecosystem functions
Monitoring and adaptive management

Protecting strategies for species at risky situations
Habitat inventory, composition and structure
Functional roles and groups
Habitat connectivity and patch size
Reforestation and forest management
Wetland restoration
Remedial action plans
Coastal marsh restoration
Environmental farm plans
