

CALL FOR PAPERS

ICMEDMEC 2021
Jan 18-19, 2021
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMEDMEC 2021 : International Conference on Materials Enabled Designs and Materials Engineering Considerations is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Materials Enabled Designs and Materials Engineering Considerations. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Materials enabled designs
Product design requirements
Subassembly design requirements
Product element design requirements
Materials selection process
Materials information resources
Manufacturing process considerations
Component fabrication processes

Degradation and reliability of materials
Testing protocols
Testing problems
Product planning
Control documents
Materials engineering considerations for system-level design
Detail design and testing
