

CALL FOR PAPERS

ICMSS 2021
Jan 18-19, 2021
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMSS 2021 : International Conference on Maritime Safety and Security is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Maritime Safety and Security. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Maritime safety
Technology assessment in marine safety
Risk management for marine system and operation
Quality control and management of production process
Control and automation in navigation
Technology development for marine environment protection
Reliability, availability, maintainability, and insurance
Manufacturing of maritime facilities and supply chain systems
Strategic management, strategic thinking, and planning of marine operation

Program and project management in the field of maritime facilities and ship production
Modeling and simulation of marine communication systems and navigation
Disruptive technologies and their impacts on management
The socioeconomic impact of maritime industry and business and its technology management
Education, training and human factors related to engineering, technology management, and maritime safety
Technology development and management for marine tourism
Marine renewable energy sources as alternative energy opportunities and its management
Other issues related to design, development, evaluation, production, and operations in the field of maritime research and innovation
