

CALL FOR PAPERS

ICPCNM 2021
Jan 18-19, 2021
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICPCNM 2021 : International Conference on Physical Chemistry and New Materials is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Physical Chemistry and New Materials. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Chemical materials and engineering
Fundamentals of chemical engineering
Applications of biomedical materials
Advanced materials processing
Advanced process control
Science and technology of advanced materials
Organic chemistry
Nanomaterials
New materials and structured products
Materials chemistry and physics
Atomic molecular and laser physics
Electrochemistry
Materials forming

Polymers
Powder metallurgy and ceramic forming
Precision molding processes
Advanced bioseparation technologies
Advanced chemical engineering thermodynamics
Advanced transport phenomena
Biochemical engineering
Chemical metrology of materials
Biodiversity conservation
educational challenges and development
Chemical Reaction Engineering
Green Organic Synthesis Routes
Green Polymers from Renewable Resources
