

CALL FOR PAPERS

ICSASP 2021
Jan 18-19, 2021
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSASP 2021 : International Conference on Speech and Audio Signal Processing is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Speech and Audio Signal Processing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- | | |
|---|---|
| Audio and acoustic signal processing | User interfaces for audio management and retrieval |
| Audio, speech, and language processing | Intelligent audio effects |
| Digital audio signal processing | Audio restoration |
| Machine learning for audio signal processing | Games and entertainment |
| Semantic audio production | Speech processing and analysis |
| Semantic audio description and ontologies | Automatic music transcription |
| Audio signal processing and feature extraction | Audio source separation |
| Machine learning methods for audio content analysis | Industrial applications |
| Automatic tagging of audio signals | Semantic web |
| Content-based audio retrieval | Audio information retrieval using machine learning |
| Music information retrieval | Audio synthesis with given contextual or musical constraints using machine learning |
| Music recommendation | Audio source separation using machine learning |
| Music informatics | Audio transformations using machine learning |
