

CALL FOR PAPERS

ICSDE 2021
Jan 18-19, 2021
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSDE 2021 : International Conference on Space and Defense Electronics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Space and Defense Electronics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Defense electronics	Anomaly detection
Defense electronics system integration	Electro-optic sensing
Defense electronics and systems manufacturing	Source separation
Signal processing for defense	Target detection and identification
High performance military solutions	Multiple-input and multiple-output
Electronic warfare and radar systems	Distributed signal processing
Military embedded systems	Signal acquisition and sensor management
Avionics, ships, military vehicles and radios	Data fusion
Missile and weapons systems	Multi-target tracking
Satellites and launch vehicles	Image processing
Circuits and systems in military devices and novel technologies	Low size weight and power solutions
Electronic surveillance and countermeasures	Multimodal signal processing
Array signal processing	Radar, sonar and acoustics
