

CALL FOR PAPERS

ICUEMCA 2021
Jan 18-19, 2021
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICUEMCA 2021 : International Conference on Urban Energy Management and Control Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Urban Energy Management and Control Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Urban energy management
Sustainable urban energy planning
Sustainable urban energy systems
Smart city, urban performance and energy
Urban management and energy sustainability
Urban energy system modelling and design
Energy use in traditional and smart cities
Energy sustainability in traditional and smart cities
Energy management in urbanization processes
Energy management policies and practices
Local involvement in energy policy, planning and management

Distribution of energy resources in cities
Energy-efficient site planning
System dynamics modeling for urban energy consumption
Renewable energy for cities
Advanced technologies for urban energy systems
Urban technologies for energy management
Sustainable power generation and distribution
Urban climate, global warming and climate change
Urban energy systems design, analysis, planning and management
Renewable energy systems for smart cities
Energy demand analysis and forecasting for urban studies
