

CALL FOR PAPERS

ICGMFFA 2021
Jan 11-12, 2021
Singapore, SG

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGMFFA 2021 : International Conference on Genetically Modified Foods and Food Additives is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Genetically Modified Foods and Food Additives. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Food, public health and food policy	Functional foods and functionality
Food supplements and food labels	Food contamination and toxic components
Food quality and management	Foodborne infections and diseases
Nutrition and nutritional management	Food safety and control
Current trends and research in nutrition and food science	Food technology
Changes in food components during fermentation	Food processing and packaging technologies
Food biochemistry and food microbiology	Food and bioprocess technology
Genetically modified foods	Agriculture biotechnology
Antioxidants and lipid oxidation in foods	Food nanotechnology
Bioactive constituents, micronutrients, food additives and ingredients	Nano-engineered foods
Analytical methods for food components	Industrial applications of food technology
Enzymatic reactions in foods	Tools and techniques in food technology
