CALL FOR PAPERS

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNNLN 2021 : International Conference on Neural Networks and Learning Networks is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Neural Networks and Learning Networks. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Neural network theory & models
Computational neuroscience
Neuronal automata
Connectionist cognitive science
Pattern recognition
Neuroeconomics
Neurofinance Graphical network models
Brain machine interfaces
Evolutionary neural networks
Neurodynamics
Complex systems
Neuroinformatics

Neuroengineering
Hybrid systems
Computational biology
Neural hardware
Bioinspired embedded systems
Collective intelligence
Self-orgnization
Embodied robotics
Learning algorithms
Neural data analysis
Cognitive models
Cellular Neural Networks
