

CALL FOR PAPERS

ICECP 2021
Jan 07-08, 2021
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICECP 2021 : International Conference on Ecosystem and Coastal Processes is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Ecosystem and Coastal Processes. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Coastal processes
Coastal landforms
Wave climate
Climate
Wind and waves
Evidence of the power of wind
Features of waves
Coastal processes and management
Process-based and predictive coastal erosion modeling
Impact of climate change on storm surge, erosion, water quality and geomorphic change
Monitoring of coastal change
Instrumentation systems for monitoring coastal meteorology and hydrodynamics
Beach morphology

Coastal geomorphology
Geology
Marine organisms
Human activity
Coastal erosion processes
Erosion and accretion
Swash and backwash
Abrasion
Attrition
Corrosion / solution
Hydraulic pressure
Weathering
Bioerosion
