

CALL FOR PAPERS

ICATA 2021
Feb 08-09, 2021
Amsterdam, The Netherlands

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICATA 2021 : International Conference on Animal Testing and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Animal Testing and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Animal testing and experimentation
Animal testing and the law
New alternatives to animal testing
The legal framework: history, present and future prospects for an end of nonhuman animal use in science
The culture of language around the use of animals in research
Methods for assessing the quality of animal research
The politics of nonhuman animal experimentation

Transparency that benefits animals versus transparency that appeases the public and inhibits potential scrutiny and outrage
The capabilities and boundaries of public engagement
The psychological and social implications for animal research staff
The consequences of education and training using animals
The connection/intersection between testing on humans and nonhuman animals
The challenges for the change of paradigm
