

CALL FOR PAPERS

ICDTI 2021
Feb 08-09, 2021
Amsterdam, The Netherlands

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDTI 2021 : International Conference on Dendrology and Tree Identification is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Dendrology and Tree Identification. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Dendrology
Forest biology
Forest ecology
Applications
Forest tree breeding
Wooded plants and their taxonomic interrelationships
Study and enjoyment of trees and other woody plants
Protection and conservation rare and endangered plant species worldwide
Woody species
Autecology of genera and species
Relationship with botany
Industrial development

Threats to plant species
Habitat
Form
Bark
Branches and twigs
Leaves, flowers and fruits
Location, shade tolerance and position within the forest stratification
Shape of crown, texture, color and shape of bole
Identification of trees by their bark, twigs, leaves and habitat,
Five features of tree identification
Differences between evergreen and deciduous trees
