

# CALL FOR PAPERS

**ICIFC 2021**  
**Feb 08-09, 2021**  
**Amsterdam, The Netherlands**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICIFC 2021 : International Conference on Information-Flow Control is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Information-Flow Control. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- |   |  |
|---|--|
| Information-flow control                            | Security type system                           |
| Data isolation                                      | Declassification approaches for implicit flows |
| Data flow tracking                                  | The naïve approach                             |
| Data flow enforcement                               | No sensitive upgrade                           |
| Secure information flow control in systems          | Permissive upgrade                             |
| Models for decentralized information-flow control   | Privatization inference                        |
| Information-flow control for secure cloud computing | Application in computer systems                |
| Challenges for information-flow security            | Open-source software                           |
| Cloud computing and security                        | General cloud security concerns                |
| Explicit flows and side channels                    | Information-flow control system design         |
