

CALL FOR PAPERS

ICNI 2021
Feb 08-09, 2021
Amsterdam, The Netherlands

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNI 2021 : International Conference on Network and Infrastructure is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Network and Infrastructure. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Network infrastructure
Network infrastructure management
Network architecture
Software defined networking
Network function virtualization
Centralized and distributed control
SDN switch/router architectures/designs
Network softwarization
Mobility, security and safety
Resource management and orchestration
Broadband wireless communications
Communication QoS, reliability and modeling
Sensor array and multichannel signal processing

Signal processing for communications and networking
Scalable and flexible energy efficiency network architectures
Traffic measurement, analysis and control
Big data and cloud computing
Cloud computing programming and application development
Client-cloud computing challenges
Performance and QoS in cloud computing
Audio and acoustic signal processing
Image, video and multidimensional signal processing
Sensing, smart spaces, and internet of things
IoT paradigms, systems, components, architectures, applications
M2m and d2d communications in smart spaces
Sustainable design and technologies for smart spaces
