

CALL FOR PAPERS

ICNTA 2021
Feb 08-09, 2021
Amsterdam, The Netherlands

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNTA 2021 : International Conference on Networking Technology and Administration is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Networking Technology and Administration. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Networking technology
Broadband network technology
The internet
Adaptations multimedia systems
Information systems of transport
Basic Technologies and their suitability for ad-hoc networks
Vehicular ad-hoc networks
Wireless sensor networks
Security, privacy and authentication in mobile environments
Optimization models and algorithms
B3G/4G Systems, WiMAX, WLAN, WPAN
Integration of ad hoc networks with wireless access networks
Wireless mesh networks

Architectures and protocols for large ad-hoc networks
New application scenarios for ad-hoc networks
Applications and application architectures (e.g., P2P) for ad-hoc networks
Cross-layer security
Cross-layer design and optimization
QoS in ad-hoc environments
Cloud computing
Management of networked systems
Methods for design, implementation, and analysis of networked systems
Online social networks, cyber-physical systems, smart grid
Middleware architectures and platforms for networked systems
Broadband wireless communication systems
Energy efficiency
