

CALL FOR PAPERS

ICSCCS 2021
Feb 08-09, 2021
Amsterdam, The Netherlands

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSCCS 2021 : International Conference on Security and Cryptography for Computing Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Security and Cryptography for Computing Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Compiler and runtime support for security
Cryptography in embedded and reconfigurable systems
Design automation and verification of security
Efficient cryptography through multi/many core systems
Fault attacks and countermeasures, including interaction with fault tolerance
Hardware architecture and extensions for cryptography
Hardware/software security techniques

Hardware trojans and reverse engineering
Physical unclonable functions
Reliability and privacy in embedded systems
Security of cyberphysical systems
Security of networks-on-chips and multi-core architectures
Side channel attacks and countermeasures
Engineering and efficient implementation of post-quantum cryptographic primitives
