

CALL FOR PAPERS

ICSCE 2021
Feb 08-09, 2021
Amsterdam, The Netherlands

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSCE 2021 : International Conference on Sustainability of Concrete Elements is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Sustainability of Concrete Elements. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Durability and sustainability of concrete mixtures
Supplementary cementitious materials
Bio-based materials
Green materials
Nano-materials
Freezing and thawing resistance
Sulfate attack

Microstructure
Deicer salt scaling
Durability and mechanical properties of sustainable concretes
Effects of advanced, multifunctional, green and sustainable materials on the durability and sustainability of concrete elements
Nano-engineered pavements and structures
Monitoring of sustainable concrete pavements and structures
Machine learning techniques and artificial intelligence for sustainable concretes
