

CALL FOR PAPERS

ICSFE 2021
Feb 08-09, 2021
Amsterdam, The Netherlands

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSFE 2021 : International Conference on Software and Financial Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Software and Financial Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Financial engineering and software
Programming in financial
applications
Software technologies and financial
industry
Business context and organisational
structures
Financial software systems and
financial market
Building flexible architectures for
applications
Advanced C++ programming
Advanced system design
Advanced web technologies
Agile cloud automation

Internet and cloud computing
Principles of banking
Software measurements and quality
assurance
Financial computing
Design issues relating to parallel
and distributed networks
Encryption, security and real-time
constraints
Straight through processing (STP)
Quantitative finance
Financial software architecture
