

CALL FOR PAPERS

ICTM 2021
Feb 08-09, 2021
Amsterdam, The Netherlands

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICTM 2021 : International Conference on Topographic Mapping is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Topographic Mapping. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Topography
- Topographic mapping
- Techniques of topography
- Direct survey
- Remote sensing
- Passive sensor methodologies
- Topographic methods
- Topographic map symbols
- Photogrammetry
- Active sensor methodologies
- Forms of topographic data
- Raw survey data
- Remote sensing data

- Topographic mapping
- Digital elevation modeling
- Topological modeling
- Topography in other fields
- Topographic maps and countours
- Swath profiles
- Along-watershed profile
- Cross-cordillera profiles
- Interpretation
- Relief distribution
- Hypsometry
- Derivation of hypsometry
- Slope distribution
