

# CALL FOR PAPERS

**ICAMFE 2021**  
**Feb 15-16, 2021**  
**Istanbul, Turkey**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAMFE 2021 : International Conference on Advances in Mathematical Finance and Economics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Mathematical Finance and Economics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- |   |  |
|---|--|
| Asset pricing                           | Banking and interest rate dynamics     |
| Derivative pricing                      | Agent based computing                  |
| Genetic models in economics and finance | International finance                  |
| Financial crisis aspects                | Heterogeneous agent modeling           |
| Risk algorithms                         | Computational economics and statistics |
| DSGE models                             | Financial instability                  |
| Portfolio management                    | Arbitrage                              |
| Volatility modeling                     | Computational macroeconomics           |
| Macro-econometric models                | Efficient capital market               |
| Financial markets                       | Cognitive agent models                 |
| Empirical finance                       | Monetary policies                      |
| Macroeconomic dynamics                  | Behavioral finance                     |
| Risk management                         | Neural models of economic processes    |
