

# CALL FOR PAPERS

**ICOIPA 2021**  
**Feb 15-16, 2021**  
**Istanbul, Turkey**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICOIPA 2021 : International Conference on Optoelectronic Information Processing and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Optoelectronic Information Processing and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Optoelectronic information  
processing

Optoelectronics, instrumentation  
and data processing

Photonic devices for optical and  
optoelectronic information  
processing

Optics for information systems

Channel transformations for  
improving color pattern  
recognition

Nonlinear cascaded correlation  
process for recognition of target  
Fourier-plane nonlinear filtering
