

CALL FOR PAPERS

ICPSE 2021
Feb 15-16, 2021
Istanbul, Turkey

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICPSE 2021 : International Conference on Power Systems and Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Power Systems and Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Energy efficiency and energy management
Renewable, green and alternative energy
The impact of climate change
Cogeneration and distributed generation
Smart grid and electric metering innovations
Integrated building automation and energy management
Lighting efficiency
Hvac systems and controls
Thermal storage and load management
Boilers and combustion controls
Solar and fuel cell technologies
Applications specific to federal energy management programs
Energy project financing success strategies and incentives

Energy-efficient technologies
Integrated building automation and energy management
Renewable, green and alternative energy
Combined heat and power, cogeneration/distributed generation
Solar and fuel cell technologies
Applications specific to federal energy management programs
Efficient lighting including led/solid state technologies
Lighting controls and smart lighting systems
Boilers and combustion controls
High-performance hvac systems and controls
Thermal storage and load management
Geoexchange technologies
Energy services and project financing
