

CALL FOR PAPERS

ICCECS 2021
Feb 18-19, 2021
Jeddah, Saudi Arabia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCECS 2021 : International Conference on Crystal Engineering and Crystallization Solutions is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Crystal Engineering and Crystallization Solutions. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Crystal engineering
Crystal design and function
Intermolecular interactions
Crystal packing and polymorphism
The holistic crystal
Crystal structure prediction
Crystallization mechanisms
Non-covalent control of structure
Organic solid-state forms
Design of multi-component crystals
Enantiotropic and monotropic
related polymorphs
Property design

Strategies and architectures
Recent advances in crystal
engineering
Crystallization solutions
Chemical crystallography
Crystal growth
Crystallography of novel materials
Electron crystallography
Salt cocrystal continuum
Pharmaceutical cocrystals
Hydrogen bridges in crystal
engineering
Crystal engineering of diamondoid
networks
Crystal engineering applications
