

CALL FOR PAPERS

ICCSCCCB 2021
Feb 18-19, 2021
Jeddah, Saudi Arabia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCSCCCB 2021 : International Conference on Composite Steel-Concrete Construction and Composite Buildings is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Composite Steel-Concrete Construction and Composite Buildings. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

- Composite steel-concrete construction
- Composite construction
- Steel-concrete composite buildings
- Advantages of steel-concrete composite construction
- Composite steel structures
- Composite steel and concrete structure design requirements
- Fatigue design of steel and composite structures
- Life cycle cost analysis of buildings
- Sustainable design of deconstructable steel-concrete composite construction
- Stability and ductility of steel structures
- Composite steel and concrete structural systems for seismic engineering
- House building
- Composite wood decking
- High performance composites
- Structural analysis
- Composite materials
- Composite members
- Composite floor construction
- Composite bridges
- Propped construction
- Resistance of section
- Continuous beams and slabs
- Shear connection
- Composite columns
- Partially encased steel sections
- Composite slabs
