

CALL FOR PAPERS

ICOSMMC 2021
Feb 18-19, 2021
Jeddah, Saudi Arabia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICOSMMC 2021 : International Conference on Organic Semiconducting Materials and Molecular Crystals is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Organic Semiconducting Materials and Molecular Crystals. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Organic semiconducting materials
Mechanical properties of organic semiconductors
Optical properties of organic semiconductors
Amorphous molecular films
Molecularly doped polymers
Molecular crystals

Neat polymer films
Design and characterization organic semiconductors
Charge transport in organic semiconductors
Charge mobilities in organic semiconducting materials
Organic semiconductors for device applications
