

# CALL FOR PAPERS

**ICAEM 2021**  
**Feb 11-12, 2021**  
**Kuala Lumpur, Malaysia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAEM 2021 : International Conference on Analysis of Electrical Machines is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Analysis of Electrical Machines. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Analysis of electrical machines  
Commutator machines  
Synchronous and induction machines  
Transient analysis of noncommutator machines  
Physical basis for machine inductance parameters

Two-winding transformers  
Multi-winding transformers  
Transients in magnetically coupled windings; no leakage and finite leakage  
Forces and torques in unsaturated magnetic systems  
Saturated magnetic systems
