

# CALL FOR PAPERS

**ICHS 2021**  
**Feb 11-12, 2021**  
**Kuala Lumpur, Malaysia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICHS 2021 : International Conference on Hydroelectric Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Hydroelectric Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Hydroelectricity and energy storage	Electrolytes; oxygen ion, proton and mixed conductors
Power system and energy engineering	Fuel cell catalysts and catalyst support
Biotechnology	Hydropower technologies and applications
Power system planning and scheduling	Low-head hydropower
Power system protection, operation and control	Materials and manufacturing
Transmission and distribution system and apparatus	Hydropower systems
Advanced characterization techniques	Hydropower plants
All solid state batteries	Run-of-the-river power plants and river power plants
Batteries for grid energy storage	Storage power plants
Capacitive energy storage systems	Pumped storage power plants
Ceramic and metallic interconnects	Power plants for exploiting marine energy
Computational modeling of processes in SSHS	Power categories
