

# CALL FOR PAPERS

**ICISM 2021**  
**Feb 11-12, 2021**  
**Kuala Lumpur, Malaysia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICISM 2021 : International Conference on Innovations in Spacecraft Materials is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Innovations in Spacecraft Materials. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Spacecraft materials  
Materials developments for spacecraft structures  
Materials for launcher structures  
Structural material development requirements  
Considerations for materials and processes  
Selection of materials and processes  
Corrosion prevention  
The effect of space environment on materials

Composites for spacecraft structures  
Composite materials for antenna structures  
Inflatable spacecraft structures  
Stable spacecraft structures  
Protection of materials from the space environment  
Spacecraft materials in the space flight environment  
Properties of spacecraft materials and their usage
