

# CALL FOR PAPERS

**ICMSP 2021**  
**Feb 11-12, 2021**  
**Kuala Lumpur, Malaysia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMSP 2021 : International Conference on Micromanufacturing Systems and Processes is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Micromanufacturing Systems and Processes. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Micromanufacturing engineering and technology

Micromanufacturing and microforming

Micromanufacturing technologies and their applications

Mechanics and dynamics of process behavior at the microscale

The miniaturization of machines and equipment: tooling, fixturing, positioning, motion generation,

sensors systems, and control

The microfactory paradigm

New concepts and methods for micro-scale metrology

Materials handling, joining, and assembly at the micro-scale

Multi-scale modeling and simulation

Design for micro-scale manufacturing

Materials-related issues at the micro-scale

Micro-injection moulding

Micro-additive manufacturing technology

Micro-waterjet technology

Micro-electro-discharge machining

Moulded interconnect devices

Micro-scale geometry measurement

Micro-assembly

Market analysis, technological foresight, and business models for micromanufacturing
