

CALL FOR PAPERS

ICSOOC 2021
Feb 11-12, 2021
Kuala Lumpur, Malaysia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSOOC 2021 : International Conference on Supramolecular Organic and Organometallic Chemistry is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Supramolecular Organic and Organometallic Chemistry. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Organometallic chemistry and catalysis
Transition metal complexes
Rare earth chemistry
Materials and precursors
Bio-organometallic chemistry
Structure and reactivity
Applications in catalysis
Applications in asymmetric synthesis
Theoretical studies
Sustainable chemistry
Asymmetric synthesis by organometallics
Bio-organometallic and medicinal chemistry
Organometallics for energy storage and production

Clusters, coordination polymers and MOFs
F-Block OM synthesis
Green chemistry and catalysis
Main group OM synthesis
Materials and nanomaterials
Photovoltaics and solar cells
Reactivity, structure and bonding
Supramolecular chemistry
Theoretical chemistry
Transition metal OM synthesis
Advances in photovoltaic chemistry and technology
Challenges in CO₂ activation and utilization
