

CALL FOR PAPERS

ICSRAM 2021
Feb 11-12, 2021
Kuala Lumpur, Malaysia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSRAM 2021 : International Conference on Structural Reliability Assessment Methods is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Structural Reliability Assessment Methods. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Structural reliability	Monte carlo methods
Measures of structural reliability	Probabilistic information
Structural reliability assessment	Partial safety factor method
Integration and simulation methods	Load combinations
Second-moment and transformation methods	Statistical uncertainty and model uncertainty
Reliability of structural systems	Elements of statistics
Elements of structural reliability	Distributions of random variables
Structural reliability methods	Uniform distribution
Simple reliability index	Normal distribution
Geometric reliability index	Lognormal distribution
Generalized reliability index	Beta distribution
Transformation	Binormal distribution
Sensitivity analysis	Direct integration
