

CALL FOR PAPERS

ICBEF 2021
Feb 08-09, 2021
Lisbon, Portugal

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICBEF 2021 : International Conference on Biometric Engineering and Forensics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Biometric Engineering and Forensics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Advanced Pattern Recognition
Adversarial learning
Affective Database, Annotation and Tools
Affective Systems
Algorithms for face data analysis
Analysis of biometric crime scene traces
Analysis of data streaming
Analysis of posture and gait
Applications of biometrics
Artificial Intelligence
Audiovisual biometrics
Audiovisual biometrics for multimedia forensics
Behavioural biometrics

Biometric analysis of crime scene traces
Biometric and forensic analysis of crime scene traces
Biometric and non-biometric data de-identification
Biometric de-identification
Biometric Engineering and Applications
Biometric Engineering and Forensics
Biometric features degradation with decomposition
Biometric modalities
Biometric presentation attack detection
Biometric spoofing and liveness detection
Biometric systems, including embedded systems
Biometric-based cybercrime investigation
Biometrics
