

# CALL FOR PAPERS

**ICCEIDD 2021**  
**Feb 08-09, 2021**  
**Lisbon, Portugal**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCEIDD 2021 : International Conference on Computational Engineering for Industrial Development and Design is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computational Engineering for Industrial Development and Design. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Computational modeling in industrial design  
Computational modeling of industrial technologies and processes  
Computational engineering in industrial development and design  
Product development cycles  
Design and development process, testing of mechanical assemblies  
Mechanical modeling of product characteristics

Simulation methods for product development  
Numerical modeling, simulation and evaluation of results  
Quantification and evaluation of model variations  
Future prospects of product lifecycles  
Design tools and libraries
