

CALL FOR PAPERS

ICCVIM 2021
Feb 08-09, 2021
Lisbon, Portugal

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCVIM 2021 : International Conference on Computational Vision and Image Analysis is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computational Vision and Image Analysis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Computational vision	Face and gesture
Computer vision	Statistical methods and learning
Pattern recognition	Performance evaluation
Sensors and early vision	Medical image analysis
Color and texture	Image and video retrieval
Segmentation and grouping	Applications
Motion and tracking	Computer vision and image analysis
Stereo and structure from motion	Active vision
Image-based modeling	Early vision
Illumination and reflectance modeling	Feature extraction
Shape representation	Motion analysis
Object recognition	Representation
Video analysis and event recognition
