

CALL FOR PAPERS

ICGEME 2021
Feb 08-09, 2021
Lisbon, Portugal

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGEME 2021 : International Conference on Geochemical Engineering and Mineral Exploration is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geochemical Engineering and Mineral Exploration. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geochemical Engineering
Technological achievements and their applications in environmental geochemistry.
climate re-construction, retrospective on pollution.
Recent applications and developments in dendro isotopes.
Distal footprints of minerals systems
Ore deposits associated with mafic-ultramafic layered intrusions

3D modelling of muggety gold deposits
Tiny termite prospectors
AEM applied to mineral exploration
Mineral inclusions in magnetite
Applications of Raman Spectroscopy to mineral exploration
