

CALL FOR PAPERS

ICMSN 2021
Feb 08-09, 2021
Lisbon, Portugal

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMSN 2021 : International Conference on Molecular Sciences and Nanosystems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Molecular Sciences and Nanosystems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Molecular engineering and science
Nature of chemistry
Chemical compounds
Chemical reactions
Molecular reactions
Molecular structures
Chemical kinetics
Theoretical chemistry
Chemical modelling
History of molecular science
Fundamental chemistry, biology,
physics of molecular engineering
Modeling and simulations of
molecular machines and structures
Cell and tissue engineering

Molecular fabrication
Tools and processes for molecular
manipulation
Management of molecular engineering
processes
Applications molecular science
Molecular science and consumer
products
Energy harvesting and storage
Molecular and environmental
engineering
Molecular science and
immunotherapy
Synthetic biology
Techniques and instruments used in
molecular science
Computational and theoretical
approaches to molecular science
Microscopy
Molecular characterization
