The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRAFTPE 2021 : International Conference on Recent Advances and Future Trends in Pavement Engineering is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Recent Advances and Future Trends in Pavement Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Effective pavement structural design  
Pavement design and modeling  
Flexible and rigid pavements  
Bituminous and alternative materials

Recycled asphalt materials  
Real-time monitoring  
Maintenance, rehabilitation and repair
