

CALL FOR PAPERS

ICRBSDM 2021
Feb 08-09, 2021
Lisbon, Portugal

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICRBSDM 2021 : International Conference on Reuse-Based Software Development Methodology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Reuse-Based Software Development Methodology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Reuse-based software engineering
Reuse-based software development methodology
Reuse-based software development method
Software reuse and software component technology
Reuse-based software life cycle
Software reusability
General principles of reusability
Software reuse tools and techniques
Forms of reusability
Methods and tools to achieve software reusability
Domain knowledge management and reuse
Software product lines
Model-driven architecture

Design patterns and anti-patterns
Class libraries
Object-oriented frameworks
Patterns and anti-patterns in frameworks
Reusability through components and web services
Reuse advantages
Higher quality products
Less development time
Higher scheduling accuracy
Reliability
Reuse procedure
Component evaluation
Component certification
