

# CALL FOR PAPERS

**ICSMPT 2021**  
**Feb 08-09, 2021**  
**Lisbon, Portugal**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSMPT 2021 : International Conference on Surface Modification and Preparation of Textiles is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Surface Modification and Preparation of Textiles. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Surface modification of textiles  
Surface modification and preparation techniques for textile materials  
Textile surface characterization methods  
Textile surface functionalization by physical vapor deposition  
Modification of textile surfaces using electroless deposition  
Textile surface functionalization by chemical vapor deposition  
Enzyme surface modification of textiles

Modification of textile surfaces using nanoparticles  
Modification of textile surfaces using sol-gel technique  
Nano-modification of textile surfaces using layer-by-layer deposition methods  
Surface modification of textiles for composite and filtration applications  
Surface modification of textiles by aqueous solutions  
Surface modification of textiles by plasma treatments  
Emerging approaches to the surface modification of textiles
