

CALL FOR PAPERS

ICSOCP 2021
Feb 08-09, 2021
Lisbon, Portugal

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSOCP 2021 : International Conference on Self-Organizing City Planning is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Self-Organizing City Planning. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Self-organizing cities
Emergence and self-organization in urban structures
Design technologies for self-organizing cities
The design and dynamics of self-organizing cities
Prediction and planning in self-organizing cities
Simulation
Urban growth models
Urban design
Urban technologies
Urban regeneration as self-organization

Resilience of self-organized and top-down planned cities
Intelligent urbanism and smart cities
Environmental sustainability
Transit-oriented development
Regional integration
Urban planning, logistics, energy systems
Urban technology management
Sustainable urban technologies
Green urban technologies
