

# CALL FOR PAPERS

**ICSTA 2021**  
**Feb 08-09, 2021**  
**Lisbon, Portugal**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSTA 2021 : International Conference on Security Testing and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Security Testing and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Security testing  
Advances in security testing  
Security testing and applications  
Security testing in software applications  
Security mechanisms of information systems  
Protection of data and maintenance of functionality  
Logical limitations  
Security requirements  
Security confidentiality, integrity, and authentication

Security availability, authorization, and non-repudiation  
Security testing taxonomy  
Discovery and identifying systems  
Vulnerability scan  
Vulnerability assessment  
Security assessment  
Penetration test  
Security audit  
Security review
