

CALL FOR PAPERS

ICFNACSG 2021
Feb 01-02, 2021
Melbourne, Australia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICFNACSG 2021 : International Conference on Frontiers in Nucleic Acid Chemistry and Synthetic Genes is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Frontiers in Nucleic Acid Chemistry and Synthetic Genes. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Modified oligonucleotides
Artificial nucleic acids
Xeno nucleic acids
Synthetic genes
Oligonucleotide conjugates
G-quadruplex
i-motif
triplex
Antisense
siRNA
RNA interference
DNA nanobiotechnology

Nanomaterials
Aptamers
Fluorescent nucleic acids
Locked nucleic acids
Unlocked nucleic acids
DNA repair
Base-modified DNA
DNA polymerase
Circular nucleic acids
NMR of nucleic acids
Biophysical studies
