

CALL FOR PAPERS

ICWEABC 2021
Feb 01-02, 2021
Melbourne, Australia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWEABC 2021 : International Conference on Wind Engineering Applications for Building Construction is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Wind Engineering Applications for Building Construction. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Wind engineering for sustainable buildings
Effects of wind on natural and built environments
Wind tunnels
Open-jet testing
Atmospheric models
Computational fluid dynamics models
Low-rise buildings

High-rise buildings
Aerodynamics and structural dynamics
Atmospheric boundary-layer simulations
Aeroelasticity
Atmospheric turbulence
Computational fluid dynamics
Large-eddy simulation
